## Conveyor Peripherals

**Conveyor Peripherals KP Series;  
Wide range of Products**

# CONVEYOR PERIPHERALS SWITCH

Ensuring Safety of Conveyor Lines with Reliable Operation

## Emergency Pull-wire Switch

Two-Direction Operation and Manual Reversion

(KP-850-1 · KP-860 · KP-870)

Here are the switches to have a belt-conveyor stop. These are the best for the emergency stop

- You can use it as a conveyor emergency-stop device because it is simply structured with the reliable operation. Tow-direction operating system
- It is of drip-proof structure, being IP67 (\*KP-860: equivalent to IP54)
- The pulling rope is 50m at the maximum. (Refer to the Mounting Instructions)

### KP-850-1

(Standard)

#### Standard Specifications

Action : Manual-reset  
 Power Source : No need  
 Output Contact : SPDT×1  
 Contact Capacity : 250VAC 10A  
 Contact Range : C – A are closed depending on the tilt of wire lever.  
 Process Connection : 2 ×Φ10 Hole, Pitch 110  
 Enclosure Rating : IP67

\*Optionally available is KP-850-2 having 2 contacts and being used for both Alarm and control.

#### Terminal Diagram

#### Wiring Diagram

#### Outline Drawing

Figures in parentheses show ones for KP-850-2.

No.	Parts Name	Material
1	Housing	ADC
2	Cover	SPCE
3	Wire Lever	ADC
4	Wire Fastener	SPCE
5	Reversion Lever	BC
6	Cable Gland	Φ8-12indiameter

### KP-860

(with Operating Display Light)

#### Standard Specifications

Action : Manual-reset  
 Indication : Operation Lamp (Red)  
 Power Source : 100VAC or 200VAC  
 Output Contact : SPDT×2 \*One For Indication Lamp  
 Contact Capacity : 250VAC 10A  
 Contact Range : Depending on the tilt of wire lever, C – A are closed, and Operating Lamp turns on (or turns off).  
 Process Connection : 2 ×Φ10 Hole, Pitch 110  
 Enclosure Rating : Equivalent to IP54

\*Specify the power voltage (DC can be available)

No.	Parts Name	Material
1	Housing	AC
2	Cover	SPCE
3	Wire Lever	ADC
4	Wire Fastener	SPCE
5	Reversion Lever	BC
6	Cable Gland	Φ8-12indiameter
7	Indication Lamp	Red

### KP-870

(with Operating Display Board)

#### Standard Specifications

Action : Manual-reset  
 Indication : Indication Plate (Red)  
 Power Source : No need  
 Output Contact : SPDT×2  
 Contact Capacity : 250VAC 10A  
 Contact Range : C1 & A1 and C2 & A2 are closed depending on the tilt of wire lever.  
 Process Connection : 2 ×Φ10 Hole, Pitch 110  
 Enclosure Rating : IP67

4	Wire Fastener	SPCE
5	Reversion Lever	BC
6	Cable Gland	Φ8-12indiameter
7	Indication board	SPCC (Red)

detecting the belt-moving-off-to-one-side

**It can detect operational exceptions such as belt moving-off-to-one-side or meandering and protect the belt from break and prevent the conveyor line from any mechanical problem.**

- The housing main body is of aluminum casting and of light/robust build.
- It is of drip-proof structure, being IP67.
- It is two-contact system to be used for both alarm and control. (250VAC 10A)

1. A2 – C2 are closed at the tilt angle of 20° (B2 – C2 opened)
2. A1 – C1 are closed at the tilt angle of 35° (B1 – C1 opened)
3. Respective contact reversion-angle is 2 – 3°
4. The above being a standard setting, you can change the operating angle

(C1)	(A1)	(B1)
(A2)	(B2)	(C2)

When a roller is tilted at over 35 degrees:

A1 – C1 ON  
B1 – C1 OFF

When a roller is tilted at over 20 degrees:

A2 – C2 ON  
B2 – C2 OFF

[illegible]

No.	Parts Name	Material
1	Housing	ADC
2	Cover	SPCE
3	Roller	SGP
4	Roller lever	SS
5	Cable gland	φ8 –12 in diameter

- Use a rope,  $\Phi 3 - 6.5$ , of JISG3525. Actually a 304SS rope,  $\Phi 4$ , is often used.
- Fix mounting holes ( $2 \times \Phi 10$ ) on the switch horizontally to the mounting surface.
- When it comes to connecting a rope to the switch, put it on the wire clip to fix.
- A cab tyre cable of 1.25 – 2sq best fits.
- Because it is for an emergency purpose, the number of usage is extremely low. You should include the operation test into maintenance items to ensure a reliable operation in a possible emergency.

**KP-880**

**KP-850-1 · 860 · 870**

- Adjust the size of the mounting stand to that of conveyor.

The official gazette dated December 27, 1977, rules stipulating that, from the standpoint of laborers safety, conveyors may be quipped with Emergency Stop Device such as Emergency Pull-wire Switch. An employer must provide with a device with which the employee can stop the operation of conveyors (called as Emergency Stop Device by Article 151-82) in a possible emergency case where laborers may be exposed to some danger including a part of their body caught in conveyors.

SPEED DETECTOR Reliably Catching Changes of Conveyor Speed ! Preventing Motor

Directly Connected to Shaft  
Reliably Monitoring Rotating Speed

Non-contact Type, Easy to Handle,  
Reliably Monitoring Rotating Speed

■ Features

- It can detect to the high accuracy with a digital control system adopted.
- You can arbitrarily set up the operating speed in the range of 3–1999rpm. Accordingly it can widely be applied.
- The response is fast, and the time lag of output signal is about 5 seconds.
- The built-in startup compensation timer makes it possible to set up the startup compensation of about 99 seconds at the maximum.

■ Standard Specification

Power Source : 105/210VAC  $\pm 10\%$  50/60Hz  
Power Consumption : 2.5VA  
Output Contact : SPDT  
Contact Capacity : 250VAC 5A 30VDC 5A  
Allowable Speed : below 2000rpm  
Setup Range : 3–1999rpm  
Measurement Error : 2rpm  
Start-up Compensation Timer : 0 – 99 seconds  
Instrument Allowable Temperature :  $-10^{\circ}\text{C}$  to  $+60^{\circ}\text{C}$  (No condensation)  
Enclosure Rating : IP54 or equivalent  
Cable Gland : G3/4

■ Features

- It can detect to the high accuracy with a digital control system adopted.
- You can arbitrarily set up the operating speed in the range of 3 - 1999rpm. Accordingly it can widely be applied.
- Because a proximity sensor is used as a sensing element, it can certainly operate in the discretionary detecting-distance less than 8mm. Its operating life is longer because it, being non-contact, has no moving part.
- The built-in startup compensation timer makes it possible to set up the startup compensation of about 99 seconds at the maximum.

■ Standard Specification

Power Source : 105/210VAC  $\pm 10\%$  50/60Hz  
Power Consumption : 2.5VA  
Output Contact : SPDT  
Contact Capacity : 250VAC 5A, 30VDC 5A  
Allowable Speed : below 2000rpm  
Setup Range : 3–1999rpm  
Measurement Error : 2rpm  
Start-up Compensation Timer : 0~99 seconds  
Instrument Allowable Temperature :  $-10^{\circ}\text{C}$  to  $+60^{\circ}\text{C}$  (No condensation)  
Enclosure Rating : IP54 or equivalent  
Cable Gland : G3/4

■ Mounting

**KPS-11**

**KPS-21**

Mounting the device running parallel to the shaft

Mounted vertically to the shaft

# FLOW SWITCH/SENSOR Flow detection for Powder / Granules / Lump !

**Lump Flow / Upper Limit Detection**

**KP-810**

- Good for flow/level detection at the places requiring robustness, including but not limited to coal, crushed rock and mineral ore.
- Protected by a spring, the shaft is structurally robust to overload.
- Output Contact : SPDT×2
- Contact Capacity : 250VAC 10A
- Standard Operating Angle : about 10°, 15°
- Enclosure Rating : Equivalent to IPX3

Cover	SPCC
Housing	SPCC
Mounting Platform	SS400
Stopper	SS400
Torque Adjusting Spring	SWP
Sensing Plate	SPCC
Cable Gland	Adaptable Cable Φ8~Φ12

**Flow Detecton On Conveyor**

**KP-820**

(Standard dimensions)

- Good for flow detection on conveyor.
- Torque adjusting being at your complete discretion, it can be used for low density as well.
- The materials of sensing plate(SS, Rubber, SUS) can arbitrarily be selected.
- Output Contact : SPDT×1
- Contact Capacity : 250VAC 5A
- Standard Operating Angle : about 15°
- Enclosure Rating : Equivalent to IP43

Housing	AC
Lid	SPCVC
Spindle Rod	SS400
Sensing Plate	304SS
Cable Gland	Adaptable Cable Φ8~Φ12

**Flow Detection In Tilted Chute**

**KP-830**

(Standard dimensions)

- Good for detection of falling objects inside a tilted chute.
- It can also be used to detect flow inside a pipe.
- L dimensions can arbitrarily be selected.
- Flange : 5K65A JIS or equivalent
- Output Contact : SPDT×1
- Contact Capacity : 250VAC 5A
- Standard Operating Angle : about 25°
- Enclosure Rating : Equivalent to IP55

Housing/Flange	AC
Paddle	304SS
Shaft	304SS
Seal Coupling	C3604
Torque Adjusting Hole	3/8 plug
Cable Gland	G 1/2

\*Please specify the operating direction.

Install the sensing plate so that it may feel products that are being carried on a conveyor or that are being run out through the chute exit., and it will detect the presence of passing products. You can change the torque and sensing angle depending on their nature. (except KP-4 and KPG-840)

**KP-810, KP-820, KP-4, KPG-840, KP-830**

A: Blind zone B: Detection point a°: Sensing angle

As illustrated on the left, the sensing plate is at A-point when there is no passing object on a conveyor.

With a passing object drawing near, a signal turns on when the sensing plate comes to B-point.

When the passing object is gone, the sensing plate returns to A-point in consequence of the internal reversion spring and the tare of the sensing plate, and the signal turns off

\*The operating angle(a°)of the sensing plate is set to the standard value upon factory shipment

## Flow Detection On Conveyor

### KP-4

- Specially made for flow detection on conveyor.
- Simplified Dusttight Type
- Sensing Plate of urethane rubber is only available.
- Wall-mounted only Type
- Output Contact : SPDT×1
- Contact Capacity : 250VAC 10A
- Operating Angle : about 5°(fixed)
- Enclosure Rating : Equivalent to IP43.

Housing/Lid	SPCC
Lever	SS400
Spindle	SPCC
Sensing plate	Urethane Rubber
Cable gland	Adaptable cable Φ6~Φ12

## d2g4 Flame-proof Explosion-proof

### KPG-840

- Being of the structure of Flame-proof Explosion-proof, it can be used in the hazardous areas where flammable dust due to coal and so on comes into being or flammable gas exists.
- The switch part and sensing part being are completely by separated magnet coupling system Seal bellow assure a correct performance without being affected by dust and so on.
- The sensing plate is made of urethane rubber that is abrasion-resistant.
- Flange : JIS5K65A
- Output Contact : SPDT×1
- Contact Capacity : 250VAC 5A
- Operating Angle : 15°(Fixed)
- Enclosure rating : IP67

Case	AC
Mounting flange	304SS
Seal bellows	NBR
Sensing plate	Urethane rubber
Cable gland	G 1/2
NIIS	No. T29432

## Microwave Type Flow Sensor

### KFD-1

- Our unique circuit technology has been upgraded not to overlook even a grain.
- Our 24GHz technology has made it possible to sense through an intermediate barrier such as glass or synthetic resin.
- It may hardly be affected by smudges on the sensing surface or scale adhesion due to our 24GHz technology.
- It can detect flow in both small and large quantity if its sensitivity is properly adjusted.

### ■ Specification

Power Source : 105/210VAC ±10% 50/60Hz  
 Power Consumption : 5VA  
 Output Contact : SPDT×1  
 Contact Capacity : 250VAC 5A  
 Allowable temperature : -10~+55°C  
 Allowable pressure : 490kPa  
 Sensing distance : Max. 1.5m (depend on object)  
 Frequency : 24.2GHz  
 ON delay : Adjustable 10 sec at the max.  
 OFF delay : Adjustable 10 sec at the max.  
 Enclosure Rating : IP67

### ■ KP-830 Torque Adjustment

Regarding the torque adjustment, for reversion and detection, remove the 3/8 plug and turn the screw inside with a small minus screw driver.

You can adjust the position of the sensing plate by loosening the M10 lock nut.

As for the adjustment of the contact operating-angle, loosen 2 hexagon socket head screws on a switch cam and adjust the angle of the cam to tighten the 2 hexagon socket head screws again.
