

All FUTEK application illustrations are strictly conceptual. Please contact us with questions.

APPLICATION SUMMARY

Gait training and rehabilitation are not modern concepts, but through modern technologies, engineers and researchers are working on developing exoskeletons to help rehabilitate a patient at a more accelerated pace. Critical measurements are gathered during development of motor-assisted exoskeletons to ensure that proper assistance is given at different stages of treatment.

PRODUCTS IN USE

JR S-Beam Load Cell (LSB200) paired with instrumentation (USB220 and IAA Series analog amplifiers).

Sensor Solution Source

Load · Torque · Pressure · Multi Axis · Calibration · Instruments · Software
